SPECIAL ISSUE
**SPACE SUIT AND EVA
DESIGN, PROTOCOLS, AND SAFETY**

*A Selection of Papers Presented at the
9th IAA Man-in-Space Symposium, Cologne, Germany, 17-21 June 1991*

| | | |
|---|--|-----------|
| Introduction | | ix |
| PART 1: INVITED LECTURE | | |
| EVA design: lessons learned | Jerry L. Ross | 1 |
| PART 2: SPACE SUITS AND EVA | | |
| Past, present, and future: the U.S. EVA Program | James W. McBarron II | 5 |
| Design to safety: experience and plans of the Russian space suit programme | Guy I. Severin | 15 |
| The EVA space suit development in Europe | A. Ingemar Skoog | 25 |
| An assessment of habitat pressure, oxygen fraction, and EVA suit design for space operations George W. Morgenthaler, Dale A. Fester and Carolyn G. Cooley | | 39 |
| Suited crewmember productivity | A. S. Barer and S. N. Filipenkov | 51 |
| EVA safety design guidelines | Paul Tremblay | 59 |
| PART 3: WORKSHOP ON EVA SAFETY: PREBREATHE VS R-FACTOR | | |
| Workshop Panel | | 69 |
| Introduction and overview of the problem | Keith Hudkins | 71 |
| Decompression safety of EVA: Soviet protocol | Arnold S. Barer and Sergei Filipenkov | 73 |
| U.S. prebreathe protocol | James W. McBarron II | 75 |
| EVA: European plans | J. Wenzel, K. E. Klein and L. Vogt | 79 |

NUMBER 2

| | | |
|---|---|-----|
| Control of omni-directional rendezvous trajectories | Yu Shaohua, Ryojiro Akiba and Hiroki Matsuo | 83 |
| Optimal atmospheric trajectory for aero-gravity assist | F. A. Lohar, D. Mateescu and A. K. Misra | 89 |
| Proof-mass actuator control of Shuttle-based astromast | C. L. Kirk and M. S. Lee | 97 |
| Circular macroparticle accelerator: impact fusion propulsion | F. Winterberg | 107 |
| Response of a solidly rotating amphora-type liquid column to axial excitation | Helmut F. Bauer and Werner Eidel | 113 |
| Droplet vaporization in subcritical and supercritical environments; high vs low pressure modelling | Hang Jia and George Gogos | 121 |
| Synthesis of ethological studies on behavioural adaptation of the astronaut to space flight conditions | Carole Tafforin | 131 |
| <i>ACADEMY TRANSACTIONS NOTES</i> | | |
| Space activities and global popular music culture | Allison Rae Wessels and Patrick Collins | 143 |
| Quantified EEG in different <i>G</i> situations | K. de Metz, O. Quadens and M. De Graeve | 151 |
| <i>EX MUNDO ASTRONAUTICO</i> | | |
| In Memoriam—György Barta | Iván Almár | 159 |

NUMBER 3

| | | |
|---|---|-----|
| How to improve the orbit of Doppler tracked satellites | Erick Lansard | 161 |
| New kinematic relations for the large angle problem in rigid body attitude dynamics | P. Tsiotras and J. M. Longuski | 181 |
| Response of a rotating anchored finite annular liquid layer to axial excitation | Helmut F. Bauer | 191 |
| Dynamic characteristics of the partially filled rotating dewar of the Gravity Probe-B Spacecraft | R. J. Hung, C. C. Lee and F. W. Leslie | 199 |
| Nonlinear rotational maneuver and vibration damping of NASA SCOLE system | Misbahul Azam, Sahjendra N. Singh, Ashok Iyer and Y. P. Kakad | 211 |

Space Station Freedom: an overview

Richard H. Kohrs and Earle K. Huckins III 221

Cost estimates for lunar products and their respective commercial prices

H. H. Koelle and B. Johenning 227

ACADEMY TRANSACTIONS NOTE**Pierre Contensou (1914–1987) and the optimization theory and applications**

J.-P. Marec 239

NUMBER 4**Time-free transfers between libration-point orbits in the elliptic restricted problem**

K. C. Howell and L. A. Hiday-Johnston 245

Dynamics and control of a flexible tethered system with offset

V. J. Modi and R. P. Pidgeon 255

Phase plane analysis of the solar array stepping dynamics and alternative slewing strategy

P. S. Goel, P. K. Maharana and M. N. Sathyaranayana 267

Augmentation of low power hydrazine thrusters

Ilan Hadar and Alon Gany 275

"Black Betsy": the 6000C-4 rocket engine, 1945–1989. Part I

Frank H. Winter 283

"Black Betsy": the 6000C-4 rocket engine, 1945–1989. Part II

Frank H. Winter 305

Psychomotor performance during a 28 day head-down tilt with and without lower body negative pressureA. Pavly-Traon, A. Rous de Fenevrols, A. Cornac, R. Abdeselam, D. N'uygen,
M. Lazerges, A. Güell and A. Bes 319**NUMBER 5****Generalized canonical systems—I. General properties**

Sandro Da Silva Fernandes 331

Generalized canonical systems—II. Derivation of Lagrange's and Gauss' equations

Sandro Da Silva Fernandes 339

Generalized canonical systems—III. Space dynamics applications: solution of the coast-arc problem

Sandro Da Silva Fernandes 347

Tethered system attitude control after attachment point blocking

Michele Grassi, Antonio Moccia and Sergio Vetrella 355

Satellite navigation for meteorological purposes: inverse referencing for NOAA-N and ERS-1 imagers with a 1 km nadir pixel size

J. Klokočník, J. Kostelecký, H. Grassl, P. Schlüssel, L. Pospišilová, R. H. Gooding
and P. Lála

363

Plasma thruster development program at the IRS

Monika Auweter-Kurtz

377

Fluid electrolyte excretion during different hypokinetic body positions of trained subjects

Yan G. Zorbas, Konstantin A. Naexu and Youri F. Federenko

393

ACADEMY TRANSACTIONS NOTES

Nearly-uniform deployment strategy for space tether systems

E. M. Levin 399

Nonlinear oscillations of space tethers

E. M. Levin 405

ASTROSAIL and SETISAIL: two extrasolar system missions to the Sun's gravitational focuses

Jean Heidmann and Claudio Maccone 409

NUMBER 6

Aero-assisted trajectories for direct launch systems

Colin R. McInnes 411

On the non-linear dynamics of a space platform based mobile flexible manipulator

V. J. Modi, H. W. Mah and A. K. Misra 419

Gyroscopic stability of a non-rigid spacecraft

A. C. Or 441

Leisure time activities in space: a survey of astronauts and cosmonauts

Alan D. Kelly and Nick Kanas 451

ACADEMY TRANSACTIONS NOTES

Nuclear rocket propulsion principle

F. Winterberg 459

Theoretical distributions of vegetation indices and their approximation by normal distributions

Tony K. Yanev 463

Saha crater: a candidate for a SETI lunar base

Jean Heidmann 471

Harakiri in space

Harry O. Ruppe 473

NUMBER 7/8

SPECIAL ISSUE

INTERNATIONAL ASTRONAUTICAL FEDERATION THE FIRST FOUR DECADES

| | | |
|---|-------------------------|-----|
| Preface | Frederick I. Ordway III | ix |
| Foreword | F. C. Durant III | xi |
| Message from the IAF President | A. Azcárraga | xv |
| Prelude and first decade, 1951–1961 | L. R. Shepherd | 475 |
| Blossoming of the space age, 1961–1971 | W. H. Pickering | 501 |
| A decade of consolidation, 1971–1981 | A. L. Jaumotte | 509 |
| Reassessment and expansion, 1981–1991 | J. Grey | 515 |
| Recollections of events, actions and other developments in the growth of the IAF from 1981 to 1990 | J. J. Harford | 519 |
| Development of the IAF Constitution | Vladimir Kopal | 521 |
| Structure of the International Astronautical Federation | Michelle Claudin | 533 |
| Relations with international organizations | Luboš Perek | 535 |
| The IAF in review, 1951–1991 | Robert Mory | 539 |

NUMBER 9

| | | |
|---|----------------------------------|-----|
| Closed-loop vibration control of flexible space shuttle manipulator | C. L. Kirk and F. L. Doengi | 561 |
| Effect of multi-layer thermal insulation thickness and location on the hypervelocity impact response of dual-wall structures | William P. Schonberg | 577 |
| U.S. Space Station Freedom propulsion system operations | R. F. Overmyer and B. A. Winters | 591 |

| | | |
|--|--|-----|
| Operational use of environmental satellite remote sensing and satellite communications technology for global food security and locust control by FAO: The ARTEMIS and DIANA systems | J. U. Hielkema and F. L. Snijders | 603 |
| The design of lunar and Mars transportation systems utilizing extra-terrestrial resources | R. M. Zubrin | 617 |
| A low cost commercial approach to space systems development and operations | T. F. Bonner, M. A. Faget, J. P. Allen and D. H. Langstaff | 629 |
| <i>ACADEMY TRANSACTIONS NOTES</i> | | |
| A critical review on the viability of a space propulsion based on the solar wind momentum flux | Giovanni Vulpetti | 641 |
| Synthetic estimation of development cost of satellite | Zhu Yilin | 645 |
| Life-span of irradiated mammals. Mathematical modelling | E. E. Kovalev and O. A. Smirnova | 649 |

NUMBER 10

SPECIAL ISSUE

SMALL SATELLITES AT THE WORLD SPACE CONGRESS 1992

| | | |
|---|---|-----|
| Preface | Pierre Molette and Arnoldo Valenzuela | xi |
| Small satellites at The Johns Hopkins Applied Physics Laboratory | John Dassoulas | 653 |
| Management of small satellite programs—lessons learned | Rick Fleeter | 667 |
| The Brazilian scientific satellite | | |
| J. H. A. Sobral, P. Muralikrishna, M. A. Abdu, W. D. Gonzalez-Alarcon, O. Pinto Jr, B. R. Clemesha, H. Takahashi, N. B. Trivedi, U. B. Jayanti, V. W. J. H. Kirchhoff, C. J. Zamlutti, O. P. Dias Jr and D. C. Ceballos | | 675 |
| SAC-B small scientific satellite | | |
| Marcos E. Machado, Mario Acuña, Jerre B. Hartman and Mario Gulich | | 683 |
| The scientific project of the small satellite of China | Wen-Rui Hu and Heng Du | 687 |
| Micro scientific spacecraft in Japan | T. Hayashi, H. Saito, T. Orii and Y. Masumoto | 693 |

INEO—imaging of near-Earth objects

- H. Iglseder, W. Arens-Fischer, H. U. Keller, G. Arnold, R. Callies, M. Fick,
K. H. Glaßmeier, H. Hirsch, H. J. Rath, M. Hoffmann, E. Kührt, E. Lorenz,
N. Thomas and R. Wäsch 697

Microinstruments and microsensors for space science

- G. Varsi, M. Chrisp, R. Jones, T. Van Zandt, T. Kenny, W. Kaiser, W. Banerdt,
E. Hui and D. Crisp 705

NUMBER 11**SPECIAL ISSUE****RADIATION EFFECTS AND DOSIMETRY
AND PROTECTION GUIDELINES****Preface**

xi

| | | |
|--|---|-----|
| Space radiation dosimetry | G. Reitz | 715 |
| Rapid assessment of radiobiological doses for terrestrial and interplanetary space missions | G. Melkonian and J. Bourrieau | 721 |
| Cosmic dosimetry using TLD aboard spacecrafts of the "Cosmos" series | K. Hübner, P. Schmidt and J. Fellinger | 731 |
| Radiation protection guidelines for space activities | R. J. Michael Fry | 735 |
| Risks of radiation cataracts from interplanetary space missions | J. T. Lett, A. C. Lee and A. B. Cox | 739 |
| HZE particle effects in space | Gerda Horneck | 749 |
| Effects of sublethal irradiation with helium ions (300 MeV/nucleon) on basic hematological parameters of mice | M. Hofer, Š. Viklická, V. N. Gerasimenko and A. N. Kabachenko | 757 |
| Recent results of the joint ESA-DARA/IBMP experiments biokosmos "seeds" | A. R. Kranz, K. E. Gartenbach, V. V. Shevchenko, E. Schopper, B. Baican, J. U. Schott, R. Seltz, C. Heilmann, D. Dudkin, N. Nefedov and Y. Potapov | 761 |

NUMBER 12**Family of deployable/retractable structures for space application**

- J. Unda, J. Weisz, J. Rivacoba, I. Ruiz Urén and R. S. Capitanio 767

| | |
|--|-----|
| Test results of the air turbo ramjet for a future space plane | 785 |
| Nobuhiro Tanatsugu, Yoshihiro Naruo and Itaru Rokutanda | |
| Space Station Freedom ground systems program—a survey | 797 |
| A. Accola, G. Paules, J. Faulkner, G. Giampalmo and H. Kozawa | |
| Lunar oxygen: economic benefit for transportation systems and <i>in situ</i> production by fluorination | 809 |
| M. Reichert, S. Lingner and W. Seboldt | |
| Application of existing launch and flight system hardware for early SEI mission | 821 |
| W. H. Siegfried and J. M. Garvey | |
| Magnetobraking for Mars return vehicles | 829 |
| Geoffrey A. Landis | |
| Why rover preparatory programmes? The example of the French programme "VAP" | 835 |
| D. J. P. Moura, A. Baiget, F. X. Chaffaut and F. Rocard | |
| Diuretic as a means for rapid adaptation to weightlessness | 841 |
| V. B. Noskov and A. I. Grigoriev | |
| 25-Year overview: safety and rescue symposia—have they made a difference? | 845 |
| Gloria W. Heath | |
| ACADEMY TRANSACTIONS NOTE | |
| Sky distribution of artificial sources in the galactic belt of advanced cosmic life | 855 |
| Jean Heidmann | |
| EX MUNDO ASTRONAUTICO | |
| In Memoriam—Konstantin Iosofovich Gringauz | 859 |
| In Memoriam—Vladimir Nikolaevich Brukhanov | 859 |
| In Memoriam—Vladimir Pavlovich Barmin | 859 |
